Stem Flowers	3
Plants, Grasses & Ivies	5
Trees	11
Topiary	14

Avoid the risk of fire and protect your business by offering guests, customers and staff a stunning yet safe environment with our inherently fire retardant foliage.

With an incredibly realistic appearance, premium quality materials and fire retardant properties guaranteed for life, Ambius' FR trees, plants and foliage are the number one choice for architects, landscapers and interior designers looking to add a special touch to any project.

All Ambius' FR products have been tested to meet worldwide FR standards. Our fireproof foliage is created using flame-resistant materials and chemicals during the manufacturing process.

Constant prolonged exposure to bright sunlight can cause irreparable damage and colour loss to some artificial plants and foliage.

UV artificial foliage addresses this issue by offering ultraviolet protection and resistance to the colour damaging effect of extreme heat and direct sunlight. Our colourfast foliage will continue to look great forever, no matter what the weather.

To provide a premium, realistic product, the UV range is made with UV resistant materials and chemicals during the manufacturing process.

Stem Flowers

Our stemmed flowers offer seasonal refreshing of floral displays and are often impossible to decide whether they are real or artificial.

“ You don't need to fertilize or water artificial plants ”

Trees

Our artificial trees enjoy year round lush greenery with next to no maintenance, other than a regular dust and clean. Made with premium grade materials our faux trees are durable and very realistic. Ask us if you require something bespoke and bigger.
